NIG-6012	Navy/Bronze	45 μ m	1400mm	

霓彩膜 Neolris® Film 是由日鶴全新開發之創新且獨特的薄膜，一項僅25 micron厚度的裝飾用薄膜。

霓彩膜延續了彩虹膜Rainbow Film的特質，在不添加任何染料及色料的情況下，保有膜本身的透明性及光彩奪目之視覺效果，但Neolris® 提供了更優異的挺性、抗撕裂性及更優異的光澤，更適合印刷裱光之用。尤其特別的是，在不同顏色底材的襯托下，Neolris® 霓彩膜會顯現出類似金屬光澤的特殊效果，但膜本身卻不含有任何金屬成份。

在眾多的運用範疇中，Neolris®除了帶來進階的視覺觀感，更適合需高強度的產品應用，它持續灌注無限寬廣的應用設計潛能。

Neolris® Film is an outstanding and innovative decorative plastic film, carries the optical and visual effects of Rainbow Film (Iridescent). Without using any Dyes and Pigments, it brings distinct visual effects but remains its transparency. Furthermore, it offers greater rigidity, higher tear resistance and brighter gloss.

In a variety of application, Neolris® brings the upgraded visual effects and is suitable for higher strength utilization. All possible applications are limited only by our imagination.

霓彩膜應用 NEOIRIS® FILM APPLICATION

單獨使用或與異材質貼合
By itself or in a transparent lamination

貼合紙張或紙板
By laminated to paper or paperboard

切成細條
By slit into filament

貼合網布
By laminated to fabric

霓彩膜彩球 NEOIRIS® DECORATION BALL

我們依據霓彩膜獨特的光澤及易加工性，打造一系列裝飾用彩球：立體星星、雪花、花環、宮燈等。多樣化的款式適用於各種節慶或派對場合，將為您帶來前所未有的視覺效果。

"To elaborate Neolris' unique luster and easy-to-post treatment quality, we design a series of decoration balls including honeycombs, chandeliers, snowflakes, stars, bows, garlands and etc. Neolris® Decoration Ball will fit various parties and celebration, exciting your eyes with glamorous sparkling effects.
